

Thank you for the opportunity to bid your project. I look forward to providing you with a superior product, which will give the Community many years of trouble-free service. Should you wish to discuss further ways and means to make this project as efficient and cost effective as possible, please feel free to give me a call to discuss.

MODEL – GSR HERITAGE SERIES

Demountable or permanent modular galvanized steel framing system. Constructed of steel angle and formed endplates. Steel frame depth is 6". Typical panels are 96" long with two formed endplates and one vertical post

DIMENSIONS – PLAYING SURFACE: 80' x 40' x 48" tall with an 8' radius

GATES & HARDWARE

ACCESS GATES: 0" access - Qty. 1 (straight sections)

MACHINE GATES: 120" access. Double 60" leaf - Qty. 1 (straight section)

MACHINE GATE HARDWARE: Hinges are heavy duty plated steel with incorporated grease ports. They are manufactured in a way that allows for easy adjustability of the gate leafs.

ACCESS GATE HARDWARE: Hinges assemblies are heavy duty plated steel piano hinge style with grease ports. Latch assembly is heavy duty plated steel
Bolts, nuts, and washers to be plated steel

ASSEMBLY HARDWARE:

CLADDING

MATERIAL: UV Stabilized High Molecular Weight Polyethylene (HMWDPE). Panels are split into rabbeted 48" wide sections to allow for seasonal expansion and contraction

PLAYING SURFACE: Cladding = 1/2" White

Top Plate = 1/2" Blue "H" cell (reduces scratching and scuffing)

Kick Strip = 1/2" White

THRESHOLDS: Access Gate = 1" White Sanalite® on 6 1/2" tall galvanized steel frame

Machine Gate = 1" White Sanalite® on 6 1/2" tall galvanized steel frame

FASTENERS: HDPE attached with 1/4" – 20 machine screws with locking nuts. Zinc plated, and color matched to puck board

ANCHORS:

EXPANSION: 3/4" x 5" expansion anchors installed into (slab/curb built by others) with 3/8" thick laser cut, galvanized steel anchor plates.
